

## Homework Project - 4 weeks Electronics and Modern Life

Electronic devices such as computers, mobile phones, gaming devices etc. have changed the way people live. But their effect on our lives can be both good and bad.

**Task 1** – Explain the way our everyday lives have been improved with the use of electronic devices.

**Task 2** - Using the internet research the social problems that using modern electronic devices can cause. Such as; Stress, inactivity, cyber bullying etc. Remember to explain your findings do not just copy and paste.

**Task 3 - Environmental** concerns are becoming increasingly important. Research these and produce a **bold, colourful** poster (no bigger than A3), which highlights the problems and what the makers and users of electronic products can do to help solve them. Consider: power consumption, Use of materials and the throw-away society etc.

**B** – Explain at least 2 examples each for task 1 and 2. Complete a colourful poster **showing key** environmental problems of using electronics

**D/S** - Explain a range of benefits and problems for tasks 1 and 2. Complete. Complete task 3 **identifying** some problems and solutions

**P** – Complete task1 and 2 in detail showing a good understanding of the issues and Produce a poster, which **explains** a range of environmental **problems and solutions**.

(3 Pages A4 + A3 Poster Maximum)
